DEAR INDUSTRY LEADERS AND INNOVATORS

Welcome to WoodEX for Africa 2026

Since our inaugural edition in 2012, WoodEX for Africa has been the industry's home. For over a decade, this has been the one place where professionals across woodworking, sawmilling, timber construction, and forestry come together under one roof.

The connections made here, the conversations held on the exhibition floor, and the partnerships built over the years have played an important role in shaping our industry. That is a legacy we carry forward with pride into 2026.

This year's exhibition brings together a strong field of exhibitors presenting their latest technologies and solutions, including processing equipment, construction systems and sustainable materials. Whether you are sourcing new solutions, exploring opportunities, or building partnerships, we trust this event will serve you well.

WoodEX for Africa remains committed to promoting wood as a sustainable, renewable, and carbon-responsible building material. We continue to champion sustainable practices that support environmental, social and economic goals. Our exhibitors reflect an industry that takes this responsibility seriously.

As you walk the exhibition floor, we encourage you to engage with exhibitors and make the most of their expertise. Reconnect with colleagues, meet new faces, and have the conversations that move your business forward. These interactions are at the heart of what WoodEX for Africa has always been about.

In a global climate marked by uncertainty, from the ongoing conflict in Ukraine and the Middle East to rising fuel costs that are placing pressure on businesses across every sector, the resilience of our industry is clear.

We extend our sincere thanks to our exhibitors, sponsors, and partners. Your support, particularly in a year marked by increasing fuel and raw materials costs, is what makes this show possible. We do not take that for granted.

To our visitors, thank you for being here. Your presence and your continued belief in this industry are what give WoodEX for Africa its purpose. We hope you leave with useful connections, fresh thinking, and the motivation to take on what lies ahead.

Your sincerely
Stephan Jooste and the Organising Team

BUILT FOR EVERY WOODWORKING BUSINESS

PANEL & SOLID WOOD PROCESSING SOLUTIONS FOR SMALL WORKSHOPS, GROWING MANUFACTURERS & INDUSTRIAL FACILITIES

Whether you're starting a custom workshop or expanding a high-production facility, Nukor delivers woodworking machinery solutions designed for efficiency, precision, and long-term profitability.

From panel processing and edgeworking to CNC machinery and solid wood equipment, we help businesses find the right solution for their production needs.

<h3>SMALL WORKSHOPS</h3> <p><i>Flexible. Affordable. Reliable</i></p>	<h3>GROWING MANUFACTURERS</h3> <p><i>Faster Production. Greater Precision.</i></p>	<h3>INDUSTRIAL FACILITIES</h3> <p><i>High Output. Smart Automation.</i></p>
---	--	---

- ✓ MJ3200 Panel Saw
- ✓ NUK500 Series Edgebander
- ✓ Single Head Hinge Borer

Perfect for start-ups and custom workshops needing quality, reliability and value.

- ✓ NUK2030 CNC Router
- ✓ WPS332F Panel Saw
- ✓ WEG300Z Edgebander

Increased output and accuracy with automated solutions that streamline your workflow.

- ✓ WPS933 Beam Saw
- ✓ FE670A or Flexa53
- ✓ FDS611ES Nesting Machine

High-speed, high-precision machinery for maximum productivity and minimal downtime.

Acacia®
Composites
Bush to Bio Composites

ACACIA COMPOSITES MANUFACTURERS (PTY) LTD

Hall 3 Stand B6

A sustainability-driven manufacturer of high-quality Wood-Plastic Composite (WPC) products, proudly engineered in Germany and made in Namibia. We transform Namibia's abundant encroacher bush – specifically Acacia species – into durable, eco-friendly decking and construction materials, combining 70% natural wood fibres with high density polymers. Our innovative approach not only delivers superior performance and aesthetics but also contributes to land restoration and climate resilience across Southern Africa.

With a strong focus on environmental impact and social responsibility, Acacia Composites creates value from biomass that would otherwise be wasted, supporting both local employment and sustainable development. Our products are ideal for the Middle Eastern and

African markets, offering long-lasting, low-maintenance alternatives to traditional wood. At Acacia Composites, we're building more than just products— we're building a greener future. Visit us to learn how African strength and German engineering come together in every board we produce.

**AFRICA
BIOMASS
COMPANY**

www.abc.co.za

AFRICA BIOMASS COMPANY (PTY) LTD

Hall 3 Stand A9

Africa Biomass Company (ABC) converts unwanted wood into valuable, usable products using mobile wood chippers and grinders, delivering eco-

friendly, sustainable solutions to a wide range of clients. Materials can be processed either on-site or transported off-site, with the resulting products sold back to owners or supplied to alternative markets. In addition to wood processing, ABC offers specialised services, including bulk mulching for the agricultural sector and wood chip production for biomass energy applications. The company also designs, manufactures, and supplies a range of biomass equipment, including wood chippers, mulchers, and earth-moving machinery, available in various sizes to suit different operational needs.

Complementing these services, ABC supplies biomass products such as firewood, mulch, and wood chips. Through this integrated approach, ABC adds value to stranded wood resources while promoting environmental sustainability and operational efficiency.

AUSTRO MACHINERY (PTY) LTD

Hall 3 Stands A1 / B1

Biesse's cutting-edge machinery, including CNC routers, edgebanders, and beam saws, is renowned for combining speed, accuracy, and reliability.

Through Austro's technical expertise and dedicated service network, these machines empower businesses to streamline production, reduce waste, and achieve unmatched quality in furniture, cabinetry, and architectural design.

With branches in Johannesburg and Durban, Austro Machinery ensures that clients across South Africa have access not only to premium equipment but also to ongoing support, training, and tooling solutions. Together, Austro and Biesse embody a partnership built on precision, performance,

and progress — helping shape the future of woodworking in Southern Africa.

BIOENERGY EVENTS AND SERVICES

Hall 3 Stand B5

Bio360 Africa is a first-of-its-kind pan-African platform dedicated to accelerating the deployment of bioenergy and the wider bioeconomy across the continent. Positioned to make bioenergy and the wider bioeconomy major pillars of Africa's energy mix and circular economy, Bio360 Africa's primary role is to connect bioresource and biomass owners and

handlers with technology and service providers, project developers, offtakers, financiers, carbon-market actors, public bodies and policymakers. Building on more than 20 years of experience organising international bioenergy events through Bio360 Europe, the event creates a practical marketplace for technologies, projects, partnerships and investment opportunities linked to the valorisation of biological resources and organic residues.

ENERGIDROP (PTY) LTD

Hall 3 Stand E25

EnergiDrop proudly represents Kisiwa Farming, bringing a truly unique and sustainable timber product to the market: cocopalms wood.

Kisiwa Farming – Cocopalms Timber Sourced from over 2,700 hectares of coconut plantations on Mafia Island, Tanzania, Kisiwa Farming produces premium cocopalms timber through a plantation rejuvenation programme. Ageing palms, no longer bearing fruit, are replaced with young productive trees and milled into quality coconut wood planks, delivering maximum value while closing the agricultural loop. The result is a beautiful, durable, and responsibly sourced timber with a compelling sustainability story at its core. EnergiDrop also represents SPANNER RE² GMBH, offering circular economy solutions for wood residues and biomass waste across the timber and forestry industries.

Visit us to discover how cocopalms wood can enrich your product range with a material that is as distinctive as it is sustainable.

JAX OLEUM

Hall 3 Stand B23

Jax Oleum is a premium single-coat oil-based wood

stain designed to enhance, protect, and bring out the natural beauty of wood. Jax Oleum offers a durable, long-lasting finished with refined colour depth and natural visual clarity, while maintaining the authentic look and feel of real timber.

Wood is a living, breathing material that changes over time. Jax Oleum is formulated to work with the natural structure of the wood rather than sit on top of it. By penetrating into the fibres, it strengthens the surface, nourishes the timber, and creates a finish that is both visually appealing and resilient.

Our cleaning and maintenance range is specially developed to complement our wood stain. Regular maintenance helps preserve and maintain the natural character of the wood, and protect the surface from everyday wear, weathering, and environmental exposure

Designed to clean gently while nourishing the timber, the cleaning range helps extend the lifespan of wooden surfaces and keeps them looking fresh, healthy, and beautifully maintained for years to come.

KLEIBERIT SE & CO. KG

Hall 3 Stand C16

PUR adhesives for load-bearing timber construction

Structural wood-based materials are increasingly replacing sawn timber and other building materials.

Only adhesives that have been approved for the purpose can be used for manufacturing glued load-bearing wood elements. To this end, load-bearing timber components and the adhesives used with them are tested for compliance with extensive standards at special testing centers.

KLEIBERIT HotCoating for decking

The revolution in surface finishing. Developments in flooring for outdoor areas focus strongly on the functionality and quality of the surface finish.

HotCoating offers new and innovative design and

digital printing options, e.g. for decking, and meets a wide range of specifications, such as anti-slip properties, UV stability, resistance to water, heat and cold, and very high abrasion resistance.

the high-quality and environmentally friendly protection of wood. The advanced technology of molecular binding on which Rubio Monocoat is based, makes our oils not only durable but also extremely economical and user-friendly. The Rubio Monocoat oil adheres – within a couple of minutes – to the upper microns in the wood by a strong molecular binding (no film forming, no saturation). This unique technology has set Rubio Monocoat apart from other wood protection products for many years.

promote timber treatment and preservative treated timber products.

Our objectives are defined as the promotion of the preservative treatment of timber and the use of preservative treated timber products; the establishment of SAWPA as a centre for consumer information and technical enquiries; and a mouthpiece for its members on all issues that impact the industry e.g. standards and regulations etc. The Association is active and with its physical location in the SAFCA building, is positioned to cooperate with other associations in promoting the overall use of timber. The members of SAWPA are primarily preservative treatment plants, wood preservative chemical manufacturers, distributors and merchants of preservative treated timber, and other related stakeholders.

WOODWORKING MACHINERY FAIR

Hall 3 Stand E13

WMF (International Exhibition on Woodworking Machinery and Furniture Manufacturing Equipment) stands as one of the most established and influential trade fairs in Asia's woodworking and furniture manufacturing industry. Held annually in Shanghai, the exhibition serves as a premier global stage, bringing together leading exhibitors to showcase

cutting-edge machinery, sustainable materials, and revolutionary production technologies. As the industry moves toward digital transformation, WMF focuses on the latest advancements in smart manufacturing and automation, offering comprehensive solutions that cover the entire production chain—from primary wood processing to finished furniture assembly. It provides a vital one-stop platform for industry professionals, manufacturers, and distributors to explore emerging market trends, source high-quality equipment, and establish strategic international partnerships. With its long-standing reputation for excellence, WMF remains a must-attend event for those seeking to enhance their competitive edge and drive innovation within the global woodworking and furniture sectors.

Engineered & Structural Timber
Design / Furniture / Kitchens
Boards / Forestry / Sawmilling
Biomass / Treatment / Markets
Certification / Carbon credits

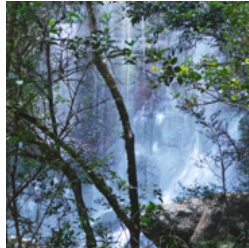

WoodBiz Africa / SA Forestry Online is Africa's only niche digital magazine with two websites offering a unique and inclusive view of the forests and wood products sector, from test tubes and soil to finished products.

THE CONTENT INCLUDES:

- Investment opportunities
- Carbon and other markets opportunities
- Value chains
- Research, tertiary and vocational institutions
- People, companies and communities
- Forest and chain of custody certification
- Furniture, kitchens and shopfitting manufacturing
- Engineered wood products, including mass timber
- Biomass

The magazine is published monthly by ForSawn Media in digital format. Printed copies can be ordered.

Don't miss out. Go to www.woodbizafrica.co.za or www.saforestryonline.co.za and subscribe to our monthly electronic WoodBiz and Forestry newsletters.

Visit our stand, meet Mickey and Joy and get a copy of the latest issue.
